- Suitable for smoke machines FireWare Cirrus, Cumulus and Stratus
- Practicing becomes more interactive with the help of remote control.
- Fitted with an on/off switch and a slider.
- Can also be operated when wearing gloves.

Product details

The Wired Remote allows you to operate your smoke machine from a distance. As a result you can exactly dose the quantity of smoke and immediately react to the exercise situation. This way the actions of the student result in more or less smoke. The exercise leader can easily coordinate this.

The remote control has an on/off switch and a slider. The slider adjusts the smoke output; this varies in principle between 0 and 100%. But if the smoke machine itself is set at an output of for example 37% maximum, the slider varies between 0 and 37%.

It is supplied including a 10-meter long cable. The cable can possibly be extended with a standard XLR-cable.
