

- Nozzle for connecting a silicone hose.
- For battery powered smokemachine Cirrus.
- Suitable for a 32 millimetre diameter hose (not included).
- Simple fastening with the help of 2 screws.

Product details

With a Ducting Adaptor it is possible to attach a piece of hose to your smoke machine. The Ducting Adaptor is fastened to the machine with the help of 2 screws and does not need to be removed after that.

Subsequently you can connect a 32 millimetre diameter silicone hose to the machine. This adapter is designed for the battery powered smoke machine Cirrus.

A hose like this is mainly used when the smoke machine needs to be located further from the staging. For example because water is used during an exercise. A smoke hose can also be handy for simulating leakages.

Sometimes a smoke machine does not entirely fit inside a special effects appliance. A smoke hose can also be useful for simulating a fire in an oven, waste paper basket or monitor.
