

- Large, reliable ventilator.
- Suitable for larger rooms.
- Easy to operate.
- Adjustable at three speeds.
- Adjustable discharge direction.

Product details

A ventilator is a perfect addition to your smoke machine. With it you can simulate a realistic smoke production. Consider for example smoke layers up against the ceiling but also a smoky atmosphere in a hallway.

When used correctly it is even possible to have a layer of smoke drop behind the crew. Finding the way back becomes increasingly harder that way. After an exercise a ventilator helps to quickly clear a room from smoke.

The Mega Fan is a universal, reliable ventilator. With three rotation speeds and proper settings for direction it is the ideal ventilator to get even more out of your smoke machine. Due to its enormous capacity (up to 220 m³/min) it is also possible to use the Mega Fan in larger exercise rooms. Exercises with repressive ventilating are also possible!
