

- Suitable for the FireWare Cumulus and Stratus.
- Direct the smoke, without toppling the machine.
- The can with the liquid can stay inside the machine.
- Finished in robust stainless steel.

Product details

The FireWare Cumulus and the Stratus allow you to produce vertical smoke. You can do this by tipping the machine. Do you prefer leaving the machine in a horizontal position? In that case you can use the Aiming Piece Cumulus/Stratus. This will allow you to direct the smoke.

The aiming piece can be placed in different positions. Therefore you can leave the machine in a horizontal position with the added benefit of being able to let the liquid can stay inside.
