

- Wireless remote control for FireWare Nimbo smoke machine.
- Exists of a transmitter and a receiver.
- Practicing becomes more interactive with the help of this remote control.

Product details

The Wireless Remote for Nimbo allows you to operate your smoke machine from a distance and wirelessly. As a result you can exactly dose the quantity of smoke and immediately react to the exercise situation. This way the actions of the student result in more or less smoke. The exercise leader can easily coordinate this.

This wireless remote control is suitable for the FireWare Nimbo. The remote control exists of 2 parts: a transmitter and a receiver. You place the receiver on the machine after which you can (de)activate the machine with the transmitter. When you keep pressing the dial the smoke machine generates more smoke, as soon as it is released it stops.

Under ideal circumstances the range is 50 meter, even through a concrete wall. But iron obstacles and interfering radio frequencies can disrupt the range. In case of using more smokemachines at the same time, this device isnt able to be programmed.
