

- To simulate a burning person.
- Suitable to practice with a fire blanket.
- Water repellent and heat resistant.
- Strengthened at the ends of the arms and legs.
- Strengthened at the crotch and armpits.
- Including fire vest for longer life span.

Product details

Practise extinguishing a burning person

With the Silver Fire Manikin you can simulate a burning person. This way students will learn how to put out flames with a fire blanket. The techniques for extinguishing a standing person can be practiced by using a standard.

The Silver Fire Manikin is manufactured from silicone cloth and strengthened with Kevlar at the crotch, the armpits and the ends of the arms and legs. One vest for the upper body is included. It is advisable to light the fire on this vest because it will considerably extend the life span of the manikin. The vest is easy to replace and has a higher heat resistance than the manikin but is not water repellent.

The best way to inflame the manikin is with the FireWare low smoke fire gel. The manikin weighs approximately 10 kilograms, as a result it is easy to carry and post on location. The silver fire manikin is not suitable to be used as a drag dummy.
