

- A complete exercise box for all kinds of scenarios
- Stimulate the senses of your students with dynamic exercises
- Equipped with 2 powerful LED fixtures and 13 sound effects
- Possibility to connect a smoke machine
- Wirelessly controllable by any device with WiFi and an internet browser
- Have the effects controlled by several instructors at the same time
- Includes a special storage space for the Cirrus battery operated smoke machine
- Equipped with a powerful battery
- Including a plastic box measuring 40 x 30 x 23,5 cm

### Product details

#### Pandora: a multi-sensory simulator

Quickly and easily set up a complete exercise whereby many senses are stimulated? The renewed Pandora makes this happen! The Pandora creates a realistic flame effect, sound effects and the control of a smoke machine. It works on a battery and can be wirelessly operated with a compact remote control.

#### Light effects

Two powerful LED flame luminaires a red one and an orange one - are mounted on the Pandora. Each luminaire can be set separately to the machine by the way it flashes. There are more than 256 simulation possibilities. By hiding the Pandora and installing a smoke machine, a realistic flame image is created. The flame simulation also gives a realistic fire sound when it is started up.

#### Sound

Sound is extremely important during an exercise. The Pandora gives this sense the attention it deserves. In addition to the big or small fire sound, you can also play the sound of sparks, a liquid leak, an explosion, a collapse, a diesel engine, a gunshot and a gas leak. But also the

slow woop, a barking dog, a victim's sobbing, a crying baby and cry for help are in the box. And you don't have to choose: the Pandora can also play all sounds at the same time, or create a mix. For example, start the exercise with the effect of a small fire. Then play the audio of the big flame over it and simulate the penetration of the fire!

## Smoke

The Pandora has a connection option for various smoking machines, including the Cirrus, Cumulus, Stratus and Nimbo. The same wireless remote control can now operate the flame, sound and smoke effect. The box of the Pandora even has a storage compartment for a Cirrus battery operated smoke generator, which is ideal for turning exercises off in areas where there is no power supply or where the power supply is disconnected during the exercise. Think of exercises on ships, in cells or in buildings designated for demolition.

## Remote control

There is nothing more annoying than an instructor who walks to the incident during the exercise to turn machines on or off. All functions of the Pandora can therefore be controlled wirelessly and remotely with your own smartphone or tablet. The Pandora itself brings a wireless WiFi network into the air. Instructors log in by scanning a QR code or manually entering a code. So no complicated software is needed. It is even possible to log in with multiple devices at the same time. Then multiple instructors can manage the functions together from various positions! The possibilities for dynamic staging are great.

The instructor can read on the digital remote whether it is connected to the Pandora. In addition, the screen indicates which effects are currently playing. You can also play with the volume of your sound effects. Which is great if you organize the staging at a great distance from the practice field!

## Battery

The interactive and smart on/off switch indicates exactly when the Pandora is ready for exercise. The instructor will then receive feedback by means of a sound signal. With the powerful battery you can then count on hours of practice fun. With a full battery you can stage the whole day.

The sound effects and the flame effects draw their power from the Pandora's battery. So you can continue with that for a while. If you connect a smoke machine, it works on its own battery (Cirrus) or on mains voltage (Cumulus, Stratus and Nimbo). Keep in mind that the Cirrus can emit smoke continuously for 10 minutes on one (own) battery charge. Naturally, the Pandora comes with a high-quality C-tek battery charger as standard. Have you stored the Pandora and is the battery almost empty? Then the exercise aid switches itself off automatically, so that the battery is not completely drained.

## Robust

The Pandora is made of high quality stainless steel in a standard euronorm crate of 40 x 30 x 30x23.5 cm. This ensures that the machine is well protected during storage, transport and operation. The electronics are fully encased to prevent (moisture) interference. All connectors, knobs and other components are of high industrial quality. That is why the Pandora has a warranty of no less than 2 years!

## Endless possibilities

The possibilities with Pandora's box are endless. For example, open the Pandora in a theater, between the set pieces. Or hide it in a wheelie bin. By hiding the Pandora and adding a smoke machine, you can simulate a beautiful fire with the necessary effects. Are you looking for a complete staging in one practice box? That is what Pandora's Box offers!

### Technical information

Brand:	FireWare
Battery:	12V / 7 Ah
Product weight (kg):	8,40
Product dimensions in cm (LxBxH):	40,0 x 30,0 x 23,5
Built in box:	Yes
Material:	RVS/Kunststof
Guarantee:	2 years on product and manufacturing faults with the exception of the battery
