FIREWARE
CREATING REALISTIC TRAINING ENVIRONMENTS

IBGS/CBRNe training kit

Article number 025-031-001
Category CBRNe

- Easy and Quick Hazardous Material Simulations
- Effective training with realistic hazard scenarios
- Magnetic sets for transport labeling (ADR, NFPA, and Kemler board)
- 6 x Color Liquids
- 6 x Smoke Cartridges
- Scent Spray for added realism

Product details

Everything you need for your IBGS/CBRNe simulation fits into one case. With this set, you can easily stage a variety of hazardous material incidents.

Simulating Hazardous Materials Incident Response
Designing effective training scenarios for hazardous materials incidents can be challenging. Without creative approaches, these trainings often turn into procedural drills. By creating a more realistic hazard environment, you can achieve more learning objectives. FireWare offers a range of products designed specifically to assist responders in training scenarios, bundled together in this comprehensive training set.

Realism Matters
When responders believe that a training scenario is genuine, the training becomes more effective. A realistic hazard setup evokes the tension associated with real incidents, enhancing focus and creating authentic challenges. For this reason, chemicals should look and smell realistic. Replace hand-drawn warning signs with proper signage to fully immerse participants in the scenario, free from distractions caused by unrealistic props. FireWare simplifies this process for you.

Color and Scent
To simulate chemical substances or vapors, the set includes six color liquids and smoke cartridges in six different colors. To enhance realism further, the kit contains Chemical Smell Spray. The more senses you engage, the more convincing your simulation becomes.

Magnetic Transport Labeling
Using magnetic labels, you can easily mark vehicles or containers with the required identifiers. The set includes GHS hazard symbols, a realistic ADR number board (Kemler board), and components to create an NFPA hazard diamond. These tools allow responders to be triggered by realistic hazards in a variety of scenarios.

Expand with the Label Set
Complete your kit with the IBGS/CBRNe label set (sold separately), which includes stickers for transport vehicles, packaging, and pipelines. Pre-designed examples of substances make it easy to set up a realistic hazard scene without requiring advanced chemical knowledge.

Technical information

Brand:	FireWare
Product weight (kg):	20,00
Including box:	Yes, plastic box
Guarantee:	2 years on product and manufacturing defects

Item consists of

028-030-008		009-006-009	Colored smoke cartridges - 5 pieces - Blue
028-030-005	Magnetic ADR Number Set - single part	009-006-010	Colored smoke cartridges - 5 pieces – Grijs
028-030-006	Magnetic Danger symbols 29 pcs - single part	009-006-011	Colored smoke cartridges - 5 pieces – Yellow
025-030-009	Color Fluid kit in plastic box 6 pcs	009-006-012	Colored smoke cartridges - 5 pieces – Green
031-030-004	FireWare Chemical Smell Spray	009-006-013	Colored smoke cartridges - 5 pieces – Orange
