

- Extinguisher to learn to extinguish, fitted with a dead mans switch at the top and a squeeze handle on the hose.
- Easy to fill with air or air and water or air, water and practice foam.
- Very suitable to practice procedures on.
- Easy to pressurize again.
- Compressor not included.

## Product details

### Refillable practice extinguisher with button

With the Practice Extinguisher Button students learn all the procedures that they need to command in a real situation. The circlip needs to be removed, after which a short attempt is made. Subsequently the extinguishing techniques are practiced on the practice extinguisher.

In some practice situations foam and even water may not be desirable. You can leave out one or both fillings and only pressurize the extinguisher. In that case the procedure from choosing the correct extinguishing agent to launching an attempt to extinguish can still be practiced. Extinguishing only with air works well in combination with a silkflame.

The extinguisher is easy to fill by unscrewing the top with a key. Next, add (if desired) a layer of practice foam and water and pressurize the extinguisher with a simple compressor via the auto valve stem or the coupling on the hose. The filling pressure can be read on the pressure gauge.

Extra circlips, O-rings and a suitable open-ended spanner to unscrew the top are optionally available.
