

- A spray can filled with the smell of fire.
- Easy to use, no machine required.
- Smell makes an exercise very realistic.
- Content; 150 ml

Product details

The Burning Smell Spray is a spray can containing the smell of fire. The spray is comparable to an air freshener and has a profound effect on the reality level of an exercise. Smell is often the first thing that people observe with regard to a possible fire. The sense of smell is stimulated and immediately puts the student on edge. Smell also often plays an important role in locating a fire.

You can for example use the Burning Smell Spray during an exercise involving a small fire in an office. Spray the office beforehand, during the fire staging, but also in the hallway. Teach your students that smelling will help to locate the fire.
