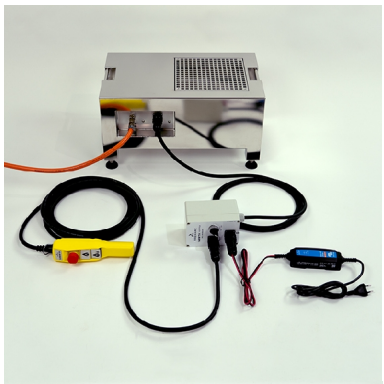
Article number 040-006-041
Category Usefull tools

- Compatible with both wired and wireless remote controls.
- Ideal for (semi-)fixed installations.
- Equipped with an on/off switch for the remote control.
- Connects the remote control and charger simultaneously.
- Prevents unnecessary power consumption.



Product details

Vesta Y-Splitter – Simultaneous Charging and Operation

The Vesta Y-splitter allows you to connect both the remote control and the charger to your fire trainer simultaneously. Ideal for (semi-)fixed installations, so you don't have to keep switching connections to charge. This ensures that your Vesta is always ready for immediate use.

For Fire Training in Fixed Setups

The Vesta fire trainer is equipped with a battery, allowing you to quickly set up an exercise anywhere. This battery powers the remote control and manages both the gas valve opening and ignition. Normally, you disconnect the remote control to charge the battery and connect the included charger to the same port. While this is perfect for mobile use, it is less practical in a fixed setup.

With the Y-splitter, you can connect both the remote control and the charger at the same time. This keeps the battery charged at all times, so you're always ready to go.

Y-spliter for Vesta

Article number 040-006-041
Category Usefull tools

Compatible with Wired and Wireless Remote Controls

The Y-splitter is compatible with both the wired and wireless remote controls of the Vesta. Additionally, it features an on/off switch that allows you to disable the remote control. This prevents accidental activation and enhances safety.

When used with the wireless remote control, the switch also cuts off power to the receiver. This prevents the connection from remaining unnecessarily active and helps reduce unnecessary power consumption.

Technical information

Brand:	FireWare
Product weight (kg):	0,50
Product dimensions in cm (LxBxH):	16,0 x 11,0 x 9,0
Colour:	Dark grey
