- Will be connected to the Vestas extra gas exit.
- With a closable gas valve.
- Top quality stainless steel.
- Including a plastic box measuring 60*40*44 cm.

Product details

Safely make a flange fire for exercices

The add-on Flange Fire is an accessory for the FireWare Vesta. The Flange Fire is an active attachment. This means you can attach this to the Vestas extra exit. Ignition will subsequently take place via the Vesta by directing the gas outflow towards the burning Vesta.

The add-on Flange Fire offers challenging OGS training. Closing the gas tap shuts off the gas supply simulated, the instructor releases the pinch handle, and the exercise is successful!

The clever design allows for this attachment to be easily packaged and moved in the plastic box supplied. The box has very handy transport measurements of 60*40*44 cm. Produced using top quality stainless steel. Also available as a Stand Alone Version.
