

- Quickly and easily simulate a burning valve
- Equipped with a closable gas tap
- Top quality stainless steel
- Manual ignition (exclusive)
- Including a plastic box measuring 60*40*44 cm

Product details

Create a real flange fire quickly and safely

The Stand-alone Flange Fire is manually ignited with a separate ignition burner (exclusive). The gas hose is equipped with a squeeze handle which regulates the gas supply from the bottle and also allows for this to be turned off quickly.

The add-on Flange Fire offers challenging OGS training. Closing the gas tap shuts off the gas supply simulated, the instructor releases the pinch handle, and the exercise is successful!

The clever design allows for this attachment to be easily packaged and moved in the plastic box supplied. The box has very handy transport measurements of 60*40*44 cm. Produced using top quality stainless steel. Also available as an Add-on for the Vesta.
