

- Suitable for creating more complex scenarios
- Works with the FireWare Vesta extinguishing trainer
- Made of high quality stainless steel
- Can be approached both from the front as well as the rear
- Equipped with a flame guide

Product details

Safely simulate a fire in a server cabinet for exercises.

This Add-on for the FireWare Vesta will allow you to simulate fires in server and patch cabinets.

This server cabinet is man-sized and equipped with 4 doors: 2 at the front and 2 at the rear. The built in flame guide allows for a flame direction to be chosen.

The setting clearly shows the fire is in the cabinet. Correctly positioning this Add-on in the room will allow you to create scenarios where the student can move beyond the fire, or can choose to stay ahead of it. In short: a scenario which is completely appropriate to our times!
