- Includes a main switch and door with rotary handle
- Direct the flame through the door opening using the flame adjuster
- Manufactured from high quality stainless steel
- Supplied in a plastic crate for transport (60 x 40 x 32.5 cm)

Product details

Simulate an electrical fire with the Vesta extinguisher trainer

Combine your extinguisher trainer with the Add-on Electrical Cabinet and safely simulate an electrical fire. With this attachment for the FireWare Vesta you offer a challenging extinguisher exercise for your students.

The housing of the Add-on Electrical cabinet is made of stainless steel and has the realistic appearance of a real electrical cabinet. The student turns the main switch to de-energize the cabinet. The door can be opened with a turn of the door handle. A flame adjuster is mounted in the box, which directs the flame through the opening of the door. You can train with a foam fire extinguisher as well as with a CO2 fire extinguisher!

Due to the smart design, the attachment can easily be stored in the supplied plastic box. That box has handy transport dimensions of 60 x 40 x 32.5 cm.
