- Suitable for all (training) fire extinguishers that also can be used for extinguishing the Vesta
- Manufactured from high-quality stainless steel
- Supplied in a plastic box for transport (60 x 40 x 32,5 cm)

Product details

Simulate a microwave fire with the Vesta extinguisher trainer

Combine this attachment with the Vesta extinguisher trainer and simulate a realistic microwave fire. With the Add-on Microwave you offer a safe and challenging fire extinguishing training for every student!

The Add-on Microwave is designed in such a way that the student will recognize the simulator as a microwave at just a glance. Moreover, the door functions are as you are used to from a real device. The door opens with a push button and will lock when pushed shut. The entire attachment is made of high-quality stainless steel.

A flame adjuster is mounted on the inside, which directs the flame through the top when ignited. By opening the door, the instructor adds an extra dimension to the exercise. You can train with a (training) fire extinguisher as well as with a CO₂ fire extinguisher. We do not recommend extinguishing with powder.

The attachment is practically designed. After your training, you can store the Add-on Microwave in the included plastic transport box. This box
