- Includes an emergency stop
- Consists of a transmitter and a receiver

Product details

Wireless control for the Vesta extinguisher trainer

With this wireless remote control you can easily operate the FireWare Vesta from a distance. The extinguisher trainer comes standard with a cable remote control. By using the Vesta wirelessly, you have more freedom during the exercise and you don't hinder others with your actions.

The industrial remote is easy to use, even when you wear firefighting gloves. There are two buttons on the remote. The first button activates the flame. Release the button and the fire goes out. The second button is for controlling the auxiliary output of the Vesta. This ignites active Vesta Add-ons. You can switch off the Vesta remotely with the emergency stop at the top. After 10 minutes without contact, the remote switches itself off automatically. The remote control works on a rechargeable NiMH battery.

The range of the Wireless Remote Control Vesta has been tested up to 50 meters. Of course, iron obstacles and radio frequencies will interfere with the range.
