

- Standalone extinguishing trainer for a gas fire.
- Fully finished in stainless steel.
- Manual ignition.
- Including plastic crate.
- Extinguishing requires water.

Product details

Safely simulate a gas fire

The Gas Cylinder Stand-Alone is a fully stand-alone extinguishing trainer. You can connect a real gas cylinder to the stainless steel Gas Cylinder Stand-Alone for the gas supply. Subsequently you can ignite the Gas Cylinder Stand-Alone manually. Limiting the gas supply from the real gas cylinder will regulate the flames.

The student can extinguish the Gas Cylinder Stand-Alone by cooling the cylinder with a jet of water and closing the gas tap on the fake Cylinder.
