

- Standalone extinguisher trainer for a solid material fire.
- Manual ignition.
- Extinguish with CO₂, foam or water.
- Already functions with only 1 bar pressure.
- Make it more realistic with real logs or fake wooden logs
- Including a plastic box measuring 60*40*32,5 cm.
- Including gas hose.

Product details

Extinguishing trainer for fires with solid material

The Solid is a fully stand-alone extinguisher trainer, good quality for a small budget. The Solid allows you to simulate a solid material fire in less than no time. With only 1 bar gas pressure you will already have a nice fire. Complete the staging by throwing some real logs or fake logs on the fire.

The Solid is easy to use. You connect the gas hose, press the handle and ignite the extinguisher trainer with a special burner (excluded). The flames stop when the instructor terminates the gas supply with the handle on the gas hose.
